WORK EXPERIENCE

Capgemini
06/2026 - Present

Consultant • Full-time
Bangalore

- Transition Management Central (TMC) – Enterprise Device Transition Platform
- Developed and delivered end-to-end full-stack features using Node.js, Express.js, Angular 17, TypeScript, GraphQL, and PostgreSQL, translating business requirements into scalable enterprise solutions supporting HP's MPS and DaaS contract lifecycle.
- Diagnosed and resolved production issues across frontend, backend, cloud infrastructure, and enterprise integrations, improving platform stability and user experience for global stakeholders.
- Leveraged GitHub Copilot and AI-assisted development tools to accelerate feature delivery, troubleshoot production issues, generate code recommendations, and improve engineering productivity while maintaining code quality and development standards.

SynapseWave Innovations
01/2025 - 06/2025

Software Engineer • Full-time
Remote

- Designed and implemented RESTful and GraphQL APIs, adhering to OWASP security standards, and improved API response time by 15%.
- Managed and optimized AWS infrastructure, utilizing EC2, S3, DynamoDB, Lambda, API Gateway, and CloudFront, ensuring scalability and cost-efficiency.

63 Moons Technologies
08/2022 - 01/2025

Software Engineer • Full-time
Remote

- Led the development and deployment of scalable microservices (Scheduler, Cloud REST API, Connector) using Node.js, Jenkins, and Docker, resulting in improved data processing efficiency.
- Implemented robust CI/CD pipelines with Jenkins, automating build, test, and deployment processes, resulting in a 25% reduction in release cycles.
- Developed gRPC services for high-performance, low-latency communication, increasing throughput between microservices.
- Configured and maintained load balancers (NGINX, HAProxy) to ensure high availability and efficient traffic distribution across AWS environments

- Developed and implemented robust monitoring and logging solutions and proactively monitored system health and performance, enabling proactive issue detection, resolution, and automated scaling strategies to handle peak loads.

Tata Consultancy Services **09/2020 - 08/2022**
Assistant System Engineer • Full-time **Noida**

- Developed and maintained Employee Health Safety and Notification Management applications using Node.js and React.js, delivering scalable features, REST APIs, and performance improvements aligned with business requirements.
- Contributed across the full Software Development Life Cycle (SDLC), including requirements analysis, development, production support, issue resolution, deployment, and technical documentation, ensuring application reliability and user satisfaction.

Carigar Services **01/2018 - 04/2018**
